VOLUME 22

CLARESHOLM, ALBERTA, FRIDAY, NOVEMBER 5, 1926

What the whole world knows:

There is only one RED CROSS

Its mission is the same throughout the world

You gave royally in war—
Won't you give royally in peace?

Wherever a sick child is found
Wherever disaster strikes
Wherever the sick and suffering cry for help

THERE IS RED CROSS

It asks your help. Now is the time to give.

ALSO A GOOD TWO REEL COMEDY

CLARESHOLM LOCAL NEWS

T. C. Milnes is in Edmonton this week.

W. O. Davies purchased a new Ford light delivery truck.

The new addition to Bethel church is making good progress.

J. A. Gray is spending a couple of days in Calgary this week and.

Clydes Power is in the local hospital this week for treatment.

J. Q. Gammon is now teller of the Royal Bank here, having been transferred from Strathmore.

Mrs. G. W. Ringrose and Miss Ethel Annundsen have been visitors at Calgary this week.

Mr. McDonald of Calgary is here visiting his brother R. S. McDonald of the Clareholm Garage.

Mrs. Don McCleary is a patient in the local hospital this week. She is reported improving satisfactorily.

Monday next being Thanksgiving Day, and a statutory holiday, all business places will of course be closed.

The Masonic lodges have purchased St. Andrew's church building and will remodel it for lodge purposes.

Mr. and Mrs. Kingsley and Mrs. Reinecke motored to Calgary on Sunday, returning Tuesday night.

Mr. McLeod has this week moved into the house recently vacated by W. K. Cornish on Railway street.

Roast chicken a specialty at the Sunshine Club food sale and bazaar, at the I. O. O. F. Hall on November 6th.

Ramage, Walls and Stark have 170 acres of breaking on their ranch that is in extra fine shape for cropping next year.

Monday night's harvesters' entertainment drew a fair house, but the boxing and wrestling events were rather tame in the main.

W. J. Chilton is building a new barn on his farm, the Beaver Lumber supplying the material and Ben Huntley is doing the building.

Wilfred Gibbie has let the contract for his new house to Mr. Baxter of Calgary. The full sized basement is well under way.

Joyous greetings we extend to the many patrons of St. John's annual bazaar. May we welcome you, one and all, on December 4th in the Parish Hall—Ladies Guild.

The attraction at the Rex theater Friday and Saturday nights this week will be "Where Was I?" starring Reginald Denny in the picturized magazine story by Edgar Franklin.

On Wednesday afternoon next, November 10, Mrs. J. T. Kingsley will hold a tea at her home for the mystery and apron tables of the bazaar to be given by St. John's Ladies Guild.

The work of setting up the new engine at the power house has made satisfactory progress during the past week and it is expected that the end of next week will see it about ready to start.

This week has given this part of Alberta perfect fall weather, mild and fine. It is the more noteworthy in that other provinces, and other parts of this province report wintry storms.

Ray Patterson and wife, old time ranchers in this district, but now located in Montana, passed through town on Tuesday on their way home from a motor trip to points further north in the province.

The third annual Armistice ball under the auspices of the social committee of Beaver Lodge No. 27, I. O. O. F., will be held in Bruhn's hall, Staveland, Thursday night, November 11. Mrs. Trainor's Calgary orchestra will supply the music.

The usual Halloween pranks such as masquerading, soaping windows and removing gates, were in evidence here last Saturday night. There were also a lot of outbursts overruled tacks driven into automobile tires, and other property damage committed by the hoodlum element.

Carl Mogensén is having an addition built to his house on Railway street. Wm. Miller is doing the work.

F. L. Overbridge who has been farming the Dickey place north of town, has bought Mrs. L. A. Ferguson's half section east of Parliament.

The Xmas shopper delights in the vagaries of fashion. She will find many trifles such as her soul loveth on Saturday, December 4, in the Parish Hall.

J. L. McCrimmon has moved his tailor shop into the O. L. Reinecke building on Third avenue. The new rooms make a fine well lighted tailor shop.

A. C. Rionce, who has been visiting at his old home, Mont Joli, Quebec, writes from Toronto that he has secured his second United States patent on his motor car device.

The Clareholm Rifle Association will hold their first shoot on Saturday afternoon at the rifle ranges at Willow Creek. Will also probably hold another shoot on Monday.

"Martin Luther, His Life and Time," a Classic eight reel moving picture, will have a special showing at Clareholm on November 17. Admission prices will be 50c and 35c.

The public school and high school teachers are attending the teachers' conventions at Calgary and Lethbridge, which opened on Thursday, and will spend Thanksgiving at their homes.

Word comes from Calgary that the Martin Luther film is going over the top in that city. Five thousand tickets were ordered, and were all sold out and another five thousand ordered.

For many weeks the ladies of St. John's Guild have been preparing the daintiest of handiwork for your Xmas selection. Their bazaar will be held in the Parish Hall, Saturday, December 4th, from 3 to 6.

Al Anderson claims he did not get a fair deal from Aberg in the third round of the wrestling bout on Wednesday night and has challenged for another match, to be held in the Rex theater on next Thursday night.

Oliver Mosley received a telegram from Whittier, California, on Thursday afternoon, stating that his mother had died at noon that day following an operation. He and his brother Harry left Thursday night on the 10 o'clock train, and Ernest Mosley and his wife left Red Deer Friday morning for Whittier.

Grade VIII of the public school held their Halloween party at the home of Mr. and Mrs. J. A. Harrison last Friday evening. Thirty of the young people were present. The evening was spent in playing games, music, etc. After partaking of a dainty lunch the gathering dispersed about 11:30, all expressing their appreciation of a very pleasant evening.

The attendance was not large at the Aberg-Anderson wrestling match on Wednesday night. Anderson won the first fall with a toe hold in 17 minutes. The second fall went to Aberg in 27 minutes. In the third round Aberg broke loose with a rush and took Anderson by surprise, pinning his shoulders to the mat in ten seconds. We understand that Moe, Canadian wrestler, has challenged the winner for a match to take place here.

In connection with our notice in this issue of the rise in the price of bread, we think an explanation is due the public at this time. It has always been recognized amongst the farmers, millers and bakers, that when threshing is in full swing, wheat slumps in price. This year the unusual has happened and it has taken a steady rise, and at this particular time is when the baker has usually bought his requirements for the year, thus being able to maintain a steady price. This is one reason. And also we recall we formerly were able to contract for 12 months we can now only do so for 4 months; this will tend to make the price of bread subject to changes in price more so than formerly. —A. Brooker.

QUOTATIONS:

"It has an ax to grind." There is no bitterness or propaganda, anti-Catholic or disemancipated. It is simply a straightforward picture of the beginnings of Protestantism. "Thirty seven hundred individuals saw the film. They learned more church history in an hour and a half than usually in many months of religious education." "Remarkable showing! Had to stop selling tickets, with 1700 in the hall; second showing 1100." "They want it again here."

New Volume Is Written Describing The Wonders And Beauties Of Canadian Scenery

Can you imagine a span of three and a half million years or so? It is, in fact, to capture to yourself the place where the Rocky Mountains now stand, with their snow-covered peaks towering into the sky, at the bottom of a deep of an inland sea.

Do you know how the Rockies were formed? By what Triassic forces great masses were crumpled and folded and lifted high in the air? It is a most interesting story that geology tells us concerning the formation of this gigantic range through the ages—ages before the human race dwelt upon the earth, and only one of the many other fascinating things that one learns about our own land, in "Picturesque America," the new volume, superbly illustrated with 100 photographs and charmingly written, which has been published by The Booklet and Photographic of America, New York.

It is a compendium, and not one answered, to Canada, that this book, which describes so clearly and well, the wonders and beauties of the parks and beauty spots of the country, should give over more than one-quarter of its space to Canada's past playground. Yet it cannot but be recognized that her parks are the result of their magnificent form and beauty of color, in their preservation of game and wild creatures, and in the preservation of great virgin forests and vast regions as yet unexplored.

The National Parks of Canada are 14 in number and range in area from a few square miles to 4,000 square miles. For the most part they are found in the western part of the country; while the three most beautiful Rocky Mountain parks, Banff, Yoho and Glacier, lie along the coast of the Canadian Pacific Railway.

Many well-known writers, such as Robert Sterling Ward, Zane Grey, Robert Blythe, Henry Van Dyke, Charles Lummis, Arthur Stringer, Mary Carolyn Davies, and J. B. Harsh have contributed to this volume, which maintains a high standard of literary quality throughout. Verses of nature by equally well-known poets are interspersed throughout, and there is added a complete index and bibliography. Hence besides the charm of the book it is invaluable as a reference. It would seem that its purpose—to make better known and thus better appreciated the scenic marvels of America—wonderlands, must be accomplished.

Dakota Settler Likes Saskatchewan

Says Any Farmer Who Wants to Work Can Make Money in the West

Mr. W. A. Hoge gives the following statement of his experience in settling in Saskatchewan to the Canadian Government Agent at Grand Forks, N.D.: "I take great pleasure in telling you what I think of the Canadian Northwest. I purchased three quarters of land in 1921 in the Wood Mountain country, south of Regina. There were 150 acres broken on the farm. In 1922 I operated the farm myself and produced 100 bushels of wheat, built a fence around half a section, also a granary, garage and slacks.

In 1923 I rented the farm, and broke 12 acres. In 1924 I broke 25 acres. In 1925 I built a barn with a hay-loft 25 by 32, also a nine-and-a-half house, 18 by 22, with full basement, and kitchen 18 by 14. The house is plastered and jack-plastered, stained and varnished inside. All buildings are well painted. I also bought one more quarter section.

This farm has proved enough to pay for all buildings and still have \$2,200 net profit in addition to paying for the farm itself.

I claim this country is the garden of Saskatchewan. Any farmer who wants to work can make money in this country."

Complete Test Flight

Two aeroplanes have just completed a test flight from Berlin to Peking and back, for the purpose of establishing a basis for a regular air service to the far east. The pilot's return was witnessed by Traffic Minister Kriehne and other government representatives; the Russian ambassador, the Chinese and Japanese ministers, and Sven Hedin, the explorer.

Clifford: "It's a pretty good looking banno, but \$15 seems high. Is it in good condition?"

Harold: "Why's it in the pink of condition?"

Harry: "It's been made easy by a patented device, rearmings a four troop, the bottom composed of wire teeth."

W. N. U. 169

World Wheat Shortage

All Factors Seem to Point to a Keen Demand This Year
Wheat production on Mother Earth in 1924 is 25,000,000 bushels less than the previous year, according to an official estimate issued by the Bureau of Statistics. This is the case notwithstanding an increase in production on this continent of nearly 40,000,000 bushels.

Taking the production—in all countries other than Canada and the United States—the crop this year will be 64,000,000 bushels less than in 1923. In North America, while Canada exports a smaller crop, the United States will increase their yield by more than 100,000,000 bushels. All factors seem to point to a keen demand of wheat, according to the report, which reads:

"India is not expected to be able to spare any appreciable quantity of wheat for export and the situation at Russia is a very uncertain. Last year it was forecast officially that the exports of wheat from the Soviet Republic might exceed 110,000,000 bushels, but from July 1 to December 31, 1923, they were actually only 14,000,000 bushels."

"The wheat crop in France is reported considerably below that of 1923 the bulletin indicates. The general outlook appears therefore to be for a strong demand for the Canadian crop."

Says Canada Needs National Viewpoint

President of Canadian Press Gives

Canada needs to think nationally to increase sympathy and usefulness amongst the East and West and to increase sympathy and knowledge between the two great races of whom the country is composed. J. H. Woods, president of the Canadian Press, and managing director of The Canadian Press, in addressing the Canadian Club.

Mr. Woods spoke on the subject of "Canada," which he said, had stood for more than 200 years as the "land of the open trail."

Tracing the story of the explorer, the settler, the pioneer and the early settler in Canada, Mr. Woods pointed out that Canada had accomplished much. Her legislative system had come to be regarded as a model among the peoples of the world. Canada had shown the world how two great nations could live side by side in harmony and yet maintain in that relationship independence and self-respect.

Busiest Spot in the World

The busiest section of sidewalks in the world is just south of Madison street on State street in Chicago, according to a survey just completed by the Associated of Commerce. The survey says that by actual count 49,000 persons walk over this section of pavement every hour during the run on week days. The walk is only 20 feet wide from the building line to the curb.

Children's clothing may be made practically fireproof if soaked for a few minutes in a solution of ammonium phosphate.

Only a small per cent of the money saved by rainy days is invested in umbrellas.

Seridians Leave Home Waters

Gold Currents Along French Coast Found to be Responsible

The French marine research vessel La Tanche has just found out why seridians leave home.

The problem has been bothering French fishermen and sailboat packers for several years, for the canneries have been threatened with closing down because the tiny fish no longer move in great schools along the French coast.

The usual workers on board the cod currents have come into the once rich arid fields and have driven them farther out to sea, where the French fishing fleet, at greater risk, is now hauling them in by netfish.

Population Increase

An average increase of nearly five per cent in the population of twenty federal electoral districts in Manitoba, Saskatchewan, and Alberta, as compared with 1921 figures, is shown by the quinquennial census of the three prairie provinces, taken as on June 1, 1926. The total population of these twenty electoral districts is given as 448,826, contrasted with 725,208 in 1921. This announcement is made as a preliminary statement of population recently handed by the Dominion Bureau of Statistics.

Dugging vs. Spraying The Potato

Report of Experiment Undertaken at Fredericton, N.B.

The report for 1923 of the Dominion Botanist is particularly worthy of study and cogitation by every ardent potato grower of any sort of produce. It is a report of rare comparison, covering records of investigation and practical experiments of practically every disease conducted by pathological experts connected with the Dominion Experimental Farm, S. M. J. MacLeod, plant pathologist in charge at Fredericton, N.B., deals largely with diseases affecting the potato. Among other things he tells of a valuable experiment carried out to test the relative efficiency of various dyes as compared with spray mixtures, about which there is considerable diversity of opinion.

A field of four and three-quarters was divided into three plots of equal area. The land was of average fertility and apparently uniform throughout. Certified French Mountain potatoes were experimented with. Liquid Bordeaux was applied by means of a power sprayer with a four-row twelve-inch boom and Bordeaux dust and copper carbonate dust by means of a Niagara traction crop duster provided with a dusted canvas. Efforts were made to apply the dust and spray mixtures—the composition and application of which are given in tabular form in the report—and to have free on dressing the Publications Branch, Ottawa—in such quantities that equal results of metallic copper could be secured.

While the results are not considered conclusive, the experiment having been conducted for only one year, a table published shows that better yields followed the Bordeaux dust than the spray as well as power machines—against such diseases as early and late blight.

Won Many Prizes

Nineteen First Class Prizes for Creamery Butter Won by Alberta at Toronto Exhibition

At the Canadian National Exhibition held recently in Toronto, thirteen exhibitors of creamery butter from the province of Alberta were awarded 19 first prizes, six second prizes and eight third prizes. In addition the silver cup for the highest scoring butter on exhibition was awarded to the Woodland Dairy Ltd., of Edmonton, on a score of 98.7 per cent out of a possible 100 points, and further, in the class for the highest average score of exhibits in the various classes the second and third prizes were awarded to the Central Creameries Ltd., Calgary, and Mr. C. E. Christensen, of the Edmonton Pure Butter Co., Edmonton.

India Has Praying Plant

Sir Jagdish Bose, a Hindu plant specialist, tells of a "praying plant" that each evening prostrates itself about the hour that the temple bells call the people to prayer. The plant is like a tree and twice the height of a man, it is said.

Wife—"I wish, dear, you would discuss with me some of the things we ought to have in our dress."—Christian Science Monitor.

Husband—"All right, what are they?"

Wife—"Well, to begin with, we ought to have a new dress."—Christian Science Monitor.

Discovery Is Made That Rust Spores Are Spread By Winds Over Great Distances

An Important Industry

Export of Flower Seeds from B.C. Is Rapidly Increasing

The culture of tulips promises to become an important industry in British Columbia. The activity thus far has been confined to Vancouver Island, where it has been conducted successfully at Stanstun, Sidney, Campbell Hill, Duncan, Royal Oak, Victoria and other points. It is now likely to be extended to the mainland.

"The production of flower seeds has become an important industry in this province. Every year a greater quantity of seed is shipped from British Columbia, and England in particular is coming to depend to a greater extent on the warm climate and rich soil of Vancouver Island for its supply of seeds. Millions of flowers blossoming all over England have generated from seeds produced in Canada."

The commercial production of sweet pea seed in particular has made great strides in the last few years, and a considerable trade has developed with seed houses in England. Sweet peas grown on Vancouver Island by an English gardener reached such perfection that he sent a sample to the old country. In response came an immediate order for half a ton of seed.

Exports of Canadian seed of all kinds in the last three fiscal years have been respectively \$2,517, 745; \$10,211,497 and \$16,792,105."

Filming Clouds

American Moving Picture Concern Goes Abroad to Get Cloud Effects

The resources of the Canadian film industry in the States is well known, but a new phase commences when the camera people decide to "can clouds." Hollywood is an ideal place for film making, owing to the clear air and bright sunlight, but there are pictures which need cloud scenes, and to complete them it is often necessary for the photographer to go far afield for his effects, what time the release of the film is delayed. To overcome this defect, and to have a reserve of "clouds," the Metro-Goldwyn-Ney company have decided to have a man specially engaged in "shooting" cloud scenes, and the celluloid records will be kept in their familiar list of the headquarters of the firm for use as and when required.—London Chronicle.

Increase in Wheat Production

Attention embraces one-third of the national wealth of Canada, according to E. S. Archibald, director of the Canadian Government Experimental Farms. It is quite possible to say that, with no action average than the present 22 million under wheat cultivation in Canada, an increase of ten bushels per acre in production, may be secured."

Helen: I fear I have made a mistake.

Ruth: Why?

Helen: He proposed in a taxi cab. The minute I accepted he said the fare and we got out and walked.

1. Twin Falls, Yoho Glacier. 2. A Raft of Fun-Lake O'Hara.

How Plaster Of Paris Received Its Name

Plaster of Paris is derived from a natural calcium sulfate. Purified this is dry, the superfluous water, the gypsum yields a fine chalky powder which, when moistened again into a paste, is pressed into a solid form, thus into a perfect replica of its model, or, making an ideal material for sculpture.

Gypsum is found in many parts of the world, but as a large part of Paris happens to be built over whole beds of it, that city was the first to discover this particular way of using it. Hence models and statues so fashioned were spoken of as being made of the plaster of Paris.

A Shameson Liffon was recently engaged by the steamship President Grant from a hatch cover floating in mid-ocean.

He: "Dearest, am I the first man that ever held you in his arms?" She: "Yes, of course. Why do you men always ask the same question?"

Ownership of the majority of the stock of The Calgary Alberta passed into the hands of Geo. M. Bell, for years president of the Regina Leader and Post newspapers, and Charles E. Campbell, former owner of the Vancouver Daily World and Vancouver Daily Star, and present owner and publisher of The Edmonton Bulletin, on Saturday last.

In the United States elections on Tuesday the Democrats made inroads on the Republican majorities in both houses of congress, though the Republicans still hold the upper hand, provided they can control the insurgent Republicans. In six states there was a majority vote in favor of modifications of the Volstead law.

LOCAL NEWS ITEMS

Those wishing a chicken, cooked or uncooked, for Thanksgiving dinner, come to the Sunshine sale in the I.O.O.F. hall on Saturday afternoon, November 6th.

The weather has been so mild here of late that trees and shrubs which lost their foliage in the first heavy frosts of autumn are coming into leaf again. This is particularly noticeable on the lilacs. We do not recall ever having known this to occur in November. The Crocuses are also blooming and pussy willows are out.

The moving picture of the recent Dempsey-Tunney contest for the heavy weight championship of the world will come to the Rex theater on Monday and Tuesday, November 22-23. This is said to be the best light picture ever filmed. Harry Scott, editor of the sport columns of the Calgary Alberta, says that seeing the picture is better than seeing the fight at the ringside.

High School Celebrates Halloween

Under the leadership of Mrs. Cornette the high school gave a Halloween party last Friday evening. The students of the School of Agriculture were present as guests of honor. Mrs. Foster was hostess at the evening.

The students gave a play called "The Country Schoolman," the following students taking the parts with much credit: Iona Murray, Bertha Strangways, Dorothy Gaudy, Margaret McMillan, Isabel Daigle, Lucille Barre, Kitty Gray, Kenneth Smith, Glenn Moffatt, Neil O'Neil, Harold Greer and Duncan McKenzie.

Marion McKenzie as president of the school literary society was chairman. Clara Simpson gave a piano solo, and Kitty Gray gave a vocal solo.

The evening closed with dancing to 12:30, music being supplied by "The Leatherhead Orchestra," Bill Thompson, Ross Moffatt, Kitty Gray, Don Torbet and Duncan McKenzie.

St. Andrew's Society of Clareholm District

The annual meeting of the above society will be held in the G. W. A. rooms on Saturday 6th November, 1926, at 8 p.m. Business. Election of officers and other competent business.

J. R. Watt, President.

Card of Thanks

Mr. and Mrs. Wilfred Gibble wish to thank the neighbors and all who helped them out through their recent fire.

Man of 60 Helped by Simple Mixture

"After taking Adlerka I feel better than for years. At my age (60) it is ideal—no different from other medicines." (signed) W. W. Carter. Adlerka is a simple mixture of buckthorn bark, glycerine, etc., which removes G.A.S. in ten minutes and often brings surprising relief to the stomach. It is a cathartic that fills, bloated feeling. Brings out old waste-matter you never thought was in your system. Excellent for chronic constipation. —Clareholm Pharmacy.

Making Good in Western Canada

John Corliss, who John Corliss settled in 1900. He was at the age of 12 years and for a family of six. Mrs. Corliss, Mary Corliss and John Corliss and the early owner of the land.

John Corliss was in the Russian Imperial Army when the Czar still ruled. He was a musician and a farmer, and while he played in an orchestra he was happy and content. Later he went to his farm, a musician's retreat in the east of Russia near Berlin. The municipality was crowded, the land was small and profits were small. John Corliss was successful but not content.

There came a letter one day from his cousin who had come to Canada in 1900. It told of the vast stretches of prairie lands, of good jobs with high wages, and of how he had come to Canada not knowing a word of English yet had had no trouble in finding work.

"Why don't you come, John, and make money too, and get ahead in this new country," the letter ran. Corliss was single and inspired with new hope left Russia and joined his cousin. He did not buy land at once but went to work in the Canadian Pacific Railway's roundhouse and began to save. During this time he married one of his own country women who joined his cousin in Southern Alberta. Land was cheap and a good start was made. Naturally there were hard years at first, new land to break and a house and barn to save for. With thrift this was accomplished.

Five children were born to John Corliss and his wife, three boys and two girls. While the last was being a baby the mother died and John Corliss faced life with five motherless children in a new country. With courage characteristic of pioneers of the land, Mary, the oldest girl, but twelve years of age, stepped in and took charge of the household. They had a small organ which Corliss played and taught Mary to play.

Years passed. This is over eight years ago now. Mary is herself married to Dave Krut, a prosperous son of a Russian pioneer who settled in the West 29 years ago.

John Corliss's eldest son, is interested in engines and recently bought a second hand tractor and went to different farms breaking land. He intends to buy a grain separator, which with his engine, will complete his threshing outfit. He will likely pay for it with this year's wages.

John Corliss's father, is proud of his family's achievements in Canada. He has a good farm all paid for and well stocked, and a fine car. And he has the assurance of a bright future for himself and his family who are growing to maturity with enterprise, intelligence and thrift as their previous assets.

"B" SQUADRON ORDERS

Orderly Officer, Lieut. W. E. Atkinson.
Next for duty, Lieut. C. Nelson.
Orderly Sergeant, Cpl. C. Loughlin.

Next for duty, Sergt. R. Smyth.
Next parade, Thursday, November 11, 1926, at 8 p.m.

E. G. Studd, Major.
Comdg. B. Squad, 2nd A.M.R.

Great Interest Shown In First Aid Study

Twenty-six blue-coated, brass-buttoned, be-medalled, Canadian Pacific Railway policemen were on hand to greet Lord Edmund Alington, conqueror of Palestine, when the famous soldier visited Montreal recently. They stood smartly at attention while the King's friend laid a wreath on the monument to the fallen soldiers in the Windsor Station and acted as his escort after his trip.

Every one of these constables is a certified St. John Ambulance Association First Aid graduate. They are among the best first aid teams in the country.

Since the inauguration of the Canadian Pacific Railway Council of the St. John Ambulance Association over 25,000 employees have been instructed in the art of rendering first aid. This includes every branch of the service.

Exclusively employed on Canadian Pacific Railway trains, some two hundred and sixty-two employees of the sleeping, dining and parlor cars recently passed the first aid examination prescribed by the St. John Ambulance Association. This group of conductors, stewards, chefs, waiters, porters and others who are employed on the P. R. trains.

The men who passed the examinations studied in their own time and without a shadow of compulsion. They voluntarily underwent a two month course of instruction by one of the Company's First Aid instructors.

In all, 421 employees took these classes, but a number of these men were engaged on long-run trains and so were unable to attend all the classes owing to absence from town. Accordingly they did not present themselves before the medical examiner, as they felt they were hardly prepared to pass the searching test involved. The knowledge they have gained, however, will stand them in good stead when the next series of classes is held.

The foregoing information came in the form of an announcement at the headquarters of the Canadian Pacific Railway in Montreal and is striking illustration of the enthusiasm with which First Aid instruction is regarded by the railway employees. First Aid classes are now being held at Quebec, Three Rivers, Montreal, Ottawa, Hull, and Smith Falls in Eastern Canada, and are being well attended by employees in all branches of the C. P. R. service.

Foothill Lodge, No. 13

Blemishes and Irritations Quickly Disappear

When Cuticura is used. Rubs with the Soap and hot water, dry gently and anoint with the Ointment. This treatment not only soothes and heals unsightly and annoying pimples, rashes and skin irritations but tends to prevent such conditions.

Sample Each Free by Mail. Address: Canadian Trade Dressing Co., 1000-10th Ave. W., Minneapolis, Minn. U.S.A. Cuticura Soap and Stick.

WORLD HAPPENINGS BRIEFLY TOLD

Professor F. Alexander Gathier, 28, president of the University of Jena, Germany, committed suicide. No reason is assigned for his act.

Britain is now exporting motor cars to the Dominion at the rate of 21,000 a year. In 1923 the number of cars exported was only 5,000.

The condition of Russian missionaries in China is becoming increasingly precarious. His feeling toward missionaries has been reported recently from widely separated cities.

Seven hundred and seventy-eight women shoplifters have been caught in the last five years by Miss Gertrude Hunter, a detective employed in one of London's largest department stores.

After cruising three days with a pirate crew, the Chinese steamer Hsin Ping arrived at Hong Kong, the pirates having fed on the approach of airplanes.

Brazilian citizens regardless of position or rank, are forbidden by a new constitutional amendment to accept foreign decorations. Citizens accepting such honors will lose their citizenship.

It is Sir Alan Cushman now. The man who culminated a series of daring long distance flights with a 25,000 mile jaunt to Australia and return, has been made a knight commander of the British Empire by the King.

In a contest recently between a motor cyclist and an express train, covering a distance of 500 miles between Sydney and Brisbane, the motor cyclist won, reaching his destination 30 minutes before the express.

Alan Brooks, Vancouver, B.C., artist-naturalist, has been awarded a gold medal by the Canadian National exhibition for his work in the Wallace Hayslock Block collection of bird paintings, shown in the natural history section of the exhibition.

Frank "Tom" Mitchell, 41, well known as a rider and expert at wheel rodeo in the United States and Canada, was killed near Hyrum, Mont., when his automobile overturned. He had driven but a few times and apparently lost control of the car. He was alone at the time.

The skull of a native of South Africa, who died a short time ago was found to measure 8 1/2 inches in length, with a capacity of 122 cubic inches. The discovery of this huge skull at the present day is believed to strengthen the theory that Africa was the cradle of the human race.

The maximum recorded temperature "in the shade" is 124 degrees Fahrenheit, observed at Greenville Ranch, Cal.

FOR "Cholera Infantum" MOTHERS SHOULD USE

D. FOWLER'S EXT-O-WILD STRAWBERRY

This valuable preparation has been on the market for over 20 years, and has no equal for effecting the vomiting, purging and clearing of the infantile system.

Put up only by The T. Millars Co., Limited, Toronto, Ont.

W. N. L. 1924

Duke Charmed With Rockies

The beauty and charm of the Canadian Pacific Rockies have registered strongly upon the tourist, the traveler and the mountain climber and the many expressions of appreciation received at the tourist department of the Canadian Pacific Railway, the following was received from Duke Dimitri of Liechtenstein, Count de Beauharnais, who journeyed with the Trail Riders of the Canadian Rockies during their recent annual ride from Lake Louise, from Banff he writes:

"I am terribly sorry that this wonderful summer is coming to an end. This country is certainly one of the most beautiful and widest I have ever seen. Lake Louise is really an ideal spot. I shall have about 3,000 feet of film of the prettiest spots of the region surrounding Banff and Lake Louise. We are about to start out for Mt. Assiniboine where we shall go to the Yoho Valley."

The Duke is a direct descendant of Charles, Marquis de Beauharnais, who governed Canada in the name of the French King Louis XV, between 1726 and 1747. He travelled from Cherbourg on the C.P.R. liner, Moltre, moored his coach the Marquis D'Albini to take part in the 33-day ride of the Trail Riders.

"IDEAL FASHIONS"

For the modern woman.

Alban Brooks, Vancouver, B.C., artist-naturalist, has been awarded a gold medal by the Canadian National exhibition for his work in the Wallace Hayslock Block collection of bird paintings, shown in the natural history section of the exhibition.

Has Never Accepted Salary

Cheques Sent to Governor of Massachusetts Are Not Cashed

Governor Alvan T. Fuller has not accepted his salary from the State or Massachusetts for the past six years, allowing \$25,000 to go back into the general funds of the Commonwealth.

As Congressmen he did not take salary from the United States; as Lieutenant-governor for four years he did not take the salary of \$10,000 a year, and so far he has not collected the \$1,500 which he has earned as governor at the rate of \$10,000 a year.

A salary check sent him each month from the state treasurer's office has never been cashed. At the end of a year, all unpaid checks are outlawed and the banks instructed not to cash them.

Capt. Bernier To Go North Again

Canadian Explorer Looking Forward To New Ventures in Hudson's Bay

Captain Bernier, hero of many expeditions in the Arctic, said, in regard to the recent action of the Russians in seizing Wrangell Island: "We had to fight this in the first place. Personally, I have never approved of the action. Ever since I was a boy I remember the island valued in key on the map, the color of which, I think, the explorer is looking forward to a new venture next year out of Hudson's Bay."

New Discovery Kills Catarrh Germ Gives Quick Relief

Nasal catarrh, "croup of the nose," discharges and annoying throat, colds, headache, hoarseness, etc., are cured by the use of the new discovery, which is a natural product of the human body, and is known as "Catarrh Germ Killer."

Immigration And Balanced Production

By C. W. Peterson

Every now and then objections are raised to policies having for their object an increase in Canada's population, on the grounds that we have not yet completely solved our industrial employment problem and, therefore, should not add to our present difficulties. Such objections are based on a complete misapprehension. They would undoubtedly be valid in fully developed, overpopulated countries, but that line of reasoning cannot consistently be applied to a new country like Canada. One family placed on a farm will create employment for from one to two additional families in its own through its own consumption of commodities, machinery and the like, and through producing the raw material of urban industry.

The recent European war and its aftermath brought home to the world a number of stern economic facts, one of them as old as the hills, but, up to that time wholly unrecognized. One of the outstanding lessons taught mankind was that there is absolutely no limit to the amount of work to be done in this world, or to the amount of business to be developed. The truth is that over production is inconceivable. The purchasing power of every country lies in the power of production, and the more each country produces, the greater may be its trade with other countries, and the more they all prosper together, the greater the variety of comforts and necessities available for the world's population.

We have not even approached within measurable distance of satisfying reasonable human wants alone over supplying them.

What Canada, and many other countries, has suffered from during recent years, and what has given rise to general unemployment, is not over-production, but imbalanced production. While Canada's population has been unequally distributed, our aggregate production has been unbalanced.

With millions of acres of the world's agricultural land lying idle and undeveloped, and the world clamoring for food, it is paradoxical to harbor an unemployment problem. Unemployment under such conditions is a symptom of failure of bankrupt statesmanship.

It is as simple as finding energy has not been focused on the solution of a problem which obviously lends itself to correction by well known and proven methods, mainly the augmentation of our productive agricultural population, which would develop and fill our unemployment for our industrial plant.

England's King Never Dies

The King of England never dies. The moment a seven-year prince wears his title, dignity and powers automatically are transferred to his apparent, who thereupon becomes "not age" even though he may not have reached his majority.

A French scientist claims that a motor fuel similar to gasoline, can be made from vegetable oil.

From Scotland's Best Experimental Farm

This is one of 23 magnificent Clydesdale stallions which arrived recently on the Anchor-Donaldson freighters Canada at Montreal. They were born on the farm of their long line, from which they were selected for export to the United States. This shipment of pure-bred horses was brought over by Q. C. Pitt, of Hinton, Saskatchewan, where they are now exploring their new Prairie home.

HURT?

Ease the pain with Minard's. It relieves inflammation, soothes and heals.

MINARD'S "KING OF PAIN" LINIMENT

People who are never in a hurry to learn believe in the theory that it is never too late to learn.

He who lives for self and self alone is a successful failure.

Secret Desires Of Royalty

If In Other People's Shoes What They Would Do.

One of the weaknesses of Royal personages is to confide in intimate friends what they would most like to do if they were in other people's shoes.

King George, King of the Belgians, would prefer to attend a horse race, and mingle with the crowd.

Queen Mary would ride on top of a London bus, all day long.

King Albert of Belgium, would travel in foreign lands and do a great deal of fishing.

King Alfonso of Spain, would like to do the work of a peasant, and live the life of a peasant for a week or two.

The Queen of Spain would appear on the stage.

Queen Marie of Rumania, would travel extensively abroad, visit new cities and listen to what the people said about her.

The Prince of Wales has never got over his fondness for climbing trees, which was denied him as a boy.

Queen Victoria always wanted to ride on a street car, but she never even had a railway ticket in her hand.

King Edward often proposed to ride in London's underground, but procrastination defeated his aim.

Tay P. O'Connor

RE. Hon. T. P. O'Connor is 78 Years of Age

RE. Hon. Thomas P. O'Connor (T.P. O'Connor), M.P., editor of "The Times" and "The Standard," has celebrated his 75th birthday recently.

Probably none of his age turns out so many newspaper columns as does this noted newspaper writer and statesman. His powers of writing remain inviolable as prodigious. He is known by everybody among the famous ones of the world and by a few of the infamous ones.

As "father" of the house of commons he was entertained by all parties in parliament at a luncheon on his 75th birthday. He was made a peer of the realm in 1921. He became censor of films in 1917.

From His Viewpoint

The small boy had always been afraid of dogs. One day, after a long struggle to get him to pass a large dog, his mother scolded him for his timidity. "You'll be afraid of dogs," was his justification. "If you were as low down as I am."

The Bureau of Mines predicts a field of wealth for state waste as an asphalt filter instead of cement or lime stone.

Bars Dampness And Wind Indefinitely

Most building papers soon lose their insulating powers. As the felled boards become disintegrated, moisture laden air enters through the joints, and the structure is rendered normal. As this treatment is based on scientific principles, and acts on the actual location of the disease it cannot fail to be successful in all forms of rot and decay. It is sold in all forms of building materials. Price \$2.00 per box, which is sufficient for 100 sq. ft. of wall. Free Trial Treatment, enough for 10 sq. ft. of wall. Write for details. Will send free trial to any suffering woman who will send her address.

CUNARD ANCHOR-DONALDSON CANADIAN SERVICE

Huge Fortune For Ex-Kaiser

Receives \$250,000,000 for Quit Claim Against Germany

A complete settlement has been made between a representative of the Prussian state and the Hohenzollern family, according to leading newspapers, whereby the former Kaiser, crown prince and their families are to receive \$250,000,000 for a quit claim against Germany.

Before the war the former Kaiser's fortune was estimated at \$100,000,000, whereas, according to reports, he is to get \$250,000,000.

The addition is estimated the ex-Kaiser has relinquished his claim on many castles.

QUALLY & YOKOM, Clareholm

Toronto.—The New York Times is about to invest \$25,000,000 in northern Ontario for the production of all of its newspaper—about 350 tons a day. The announcement of this project was made by the secretary of the president, Adolf Ochs, during the solemn of both in this city. The site selected for the paper plant is at Kapuskasing where there is already a small sulphate mill in operation. The water power, 75,000 h.p., will be generated from Sticky Falls.

Reports of recklessness on the part of motorists continue to be received at the headquarters of the Canadian Pacific Railway. In the majority of cases the accidents are reported to have been the result of negligence on the part of the car owners. Two accidents at public crossings were reported recently: one near Winnipeg when a Ford coupe ran into the side of a train which was proceeding slowly over a crossing. The second accident occurred when a truck was driven in front of a C.P.R. train at a grade-crossing near Charlton. The train was backing over the crossing at three miles an hour. In each case considerable damage to the cars was done.

Here and There

The Telephone Company of Regina has received an order for a sending and receiving wireless station to be located near Nipawin in Central Canada. This station is expected to be the largest high powered one in the world.

Ottawa.—The popular bicycle is still holding its own against motor cycle and motor car. A report of the Dominion Bureau of Statistics shows that Canadian bicycle factories in 1926 increased their output by 10 per cent over 1924. The five Canadian firms making these "wheels" are all in Ontario.

A decision was reached at a meeting of the Directors of the Bureau of the Department of Railways, held recently, to undertake the construction of a submarine tunnel under the Shinanook-Mat Straits at an estimated cost of \$10,000,000. This will connect the Main Island of Japan with Kyushu, the Southern Island.

Alberta has one of the most wonderful wild game hinterlands in North America, according to Adolph Miller, of Nipawin, Sask., game commissioner of the State. He exhibited this outfit after spending a month in the interior of the province, endeavoring to find out the conditions, including some of the caribou on the trail.

Two brothers, George and Edward Miller, of Manor, Saskatchewan, failed off the Canadian Pacific Railway and the Dominion Land Board awards in the recent pig club competition conducted by the Executive Department of the University of Saskatchewan at Saskatoon. Trophies from all parts of Saskatchewan competed.

Fredrickson, New Brunswick.—A house with antlers spreading six inches was shot in the New Brunswick woods by William Proudfoot of Belleferry, New York, while a companion of his, F. C. Allen, of New York City, brought down a lovely animal with an antler spread of 27 inches. Mr. Proudfoot's trophy creates a record for the season.

Vis-A-Vision, Sir Walter Cowan, K.C.B., of two visiting British cruisers to Philadelphia Navy Yard recently, was one of the most enthusiastic passengers on the trans-Pacific's signature train at Treasure Island, the C.P.R. exhibit in Philadelphia. The Admiralty enthusiastically enjoyed the ten-minute "Transcontinental" journey from Quebec to Vancouver.

In an effort to increase the number of ships and passengers in the northern part of the Province of Manitoba, by providing additional assistance, the Provincial Department of Agriculture has sent north sacks of wild rice to be given by volunteers over the vast duck marsh known as Moose and Cedar Lakes. This constitutes an area 20 miles wide and 90 miles long, and is the largest duck marsh and muskrat habitation on the continent.

An attempt is being made by the Canadian national committee to have the construction of baggage receptacles standardized in order to facilitate its handling. A meeting between representatives of the rail road companies and of Canadian baggage manufacturers was called recently in Toronto by W. W. Allen, general baggage agent of the Canadian Pacific Railway, and it was generally expected that significant specifications for baggage construction should be adopted.

Now Is the Time
